

FX Forward Contract – Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

FX Forward Contract

Allied Irish Bank GB (“AIBGB”)

aibgb.co.uk/fxcentre

Call +44 (0)20 7863 6950 for more information

Date of publication: 25th May 2021

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	Over the Counter Derivative (OTC) – FX Forward
Objectives	<p>A forward contract is a binding contract between you and AIBGB to exchange a specific amount of two currencies at an agreed rate, on an agreed future date(s).</p> <p>The objective of this product is to provide protection from adverse movements in foreign exchange currency rates above pre-agreed levels, ending on the expiry date. It is one of the tools available to manage your foreign exchange (FX) rate risk.</p> <p>The contract exchange rate (forward rate) is agreed at the time the forward contract is booked. The forward rate is the spot rate plus or minus the forward points which are calculated from the interest rate differential between the two currencies.</p> <p>There are two types of forward contracts:</p> <ul style="list-style-type: none">• fixed forward contracts where the drawdown is due to take place on a specific, pre-agreed future date; and• time option (sometimes called window) forward contracts where drawdown may take place between two stipulated future dates in one or more drawdowns.• Once you have executed a contract at the forward rate you cannot benefit from any subsequent favourable exchange rate movements. You are obliged to use the rate regardless of where the spot rate is at maturity. 100% of the invested amount is protected at maturity.
Intended Retail Investor	<p>This product is intended for retail businesses wishing to mitigate the exchange rate risk associated with ongoing trade transactions, but can also be used by individuals who require exchange rate certainty for specific future transactions, such as the purchase or sale of an asset denominated in a foreign currency.</p>
Term	<p>Forward contracts can be booked in all major currencies for periods greater than spot value (i.e. from 3 business days) up to typically one year. The expiry date of the forward contract will be set out in the confirmation for the product. It is a product which is entered into for its term, although early termination may occur in the event of a default by either you or AIBGB.</p>

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class.

If you cannot fulfil your contract, you may not be able to terminate it easily before maturity or you may have to end your product at a price that significantly impacts on the performance of your product. In some circumstances you may be required to make payments to pay for losses. The return of this product may change depending on currency fluctuations. **The total loss you may incur may be significant.** This product does not include any protection from future market performance so you could incur significant losses. In the event that AIBGB is not able to pay out what is owed, you could incur significant losses.

FX Forward Contract – Key Information Document

How long should I hold it and can I take money out early?

This product cannot be sold or transferred and there is no recommended holding period, it is a product which is entered into for its term. This product can only be matured on the date(s) agreed with AIB. Early termination may occur in the event of a default by either you or AIB.

Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Scenarios below are based upon a EUR/GBP forward contract assuming a nominal amount of £100,000 at an agreed exchange rate for delivery in 3 months. This table shows the money you could get back or pay after costs in 3 months' time (should you require to terminate the contract), under different scenarios assuming a nominal value of £100,000. The tax legislation of the United Kingdom may have an impact on your actual payout. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Nominal Amount £100,000				
Scenarios		3 Month	()	()
Stress Scenario	What you might get back/or pay after costs. Average return/loss over nominal amount each year	(£10,000) -10%	N/A	N/A
Unfavourable Scenario	What you might get back/or pay after costs. Average return/loss over nominal amount each year	(£5,300) -5.30%	N/A	N/A
Moderate Scenario	What you might get back/or pay after costs. Average return/loss over nominal amount each year	£300 0.30%	N/A	N/A
Favourable Scenario	What you might get back/or pay after costs. Average return/loss over nominal amount each year	£5,100 5.10%	N/A	N/A

What happens if AIBGB is unable to pay out?

We are covered by the Financial Services Compensation Scheme (FSCS). You may be entitled to compensation from this scheme if we are unable to meet any of our liabilities to you. Where an entitlement to compensation is established, the compensation payable will be the total of your net loss or £85,000 (whichever is the lesser). Further information about compensation arrangements is available from the Financial Services Compensation Service (www.fscs.org.uk).

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential exit penalties. The figures assume a nominal value of £100,000. The figures are estimates and may change in the future.

Table 1: Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Notional Amount Scenarios £100,000	If you end after 3 months	If you end after (1) years	If you end after (3) years
Total Costs	£1,400	N/A	N/A
Impact on return (RIY) per year	*1.40%	N/A	N/A

FX Forward Contract – Key Information Document

Table 2: Composition of costs

The table below shows:

- The impact each year of the different types of costs on the performance of the product at the end of the recommended holding period;
- The meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	1.40%	*The impact of the costs already included in the price.
	Exit costs	0%	The impact of the costs of exiting your investment when it matures.
Recurring costs	Portfolio transaction costs	0%	The impact of us buying and selling underlying investments for the product.
	Other ongoing costs	0%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0%	This product does not have any performance fees or carried interests.
	Carried interests	0%	

*In all cases, the transaction margin is limited to a maximum ceiling of 1.4% of the nominal amount of the transaction. There are no further recurring costs applicable.

How can I complain?
